All investment and insurance strategies have the potential for profit or loss. Different types of investments involve higher and lower levels of risk. There is no guarantee that a specific investment or strategy will be suitable or profitable for an investor's portfolio. There are no assurances that a portfolio will match or exceed any particular benchmark. Asset allocation and diversification will not necessarily improve an investor's returns and cannot eliminate the risk of investment losses.

Annuity and life insurance guarantees are subject to the claims-paying ability of the issuing insurance company. If you withdraw money from or surrender your contract within a certain period of time after investing, the insurance company may assess a surrender charge. Withdrawals may be subject to tax penalties and income taxes. Persons selling annuities and other insurance products receive compensation for these transactions. Insurance products are subject to fees and additional expenses.
